Stay Healthy on Election Day

Election Day in the United States is November 3, 2020. To reduce risk of COVID-19 exposure and avoid potentially large crowds, mail-in voting is the safest option if available in your state. Request a mail-in ballot soon. Completed mail-in ballots can be sent through the mail or, in some states, dropped in a special ballot drop box.

Here are some tips to stay safe while voting in-person:

Before voting day

★ Research your polling station to see what health and safety measures they are using.
★ Many states offer early in-person voting. Vote early to avoid crowds on election day.
★ Know your jurisdiction’s ballot, and think about who you will vote for to minimize your time voting.

On voting day

★ Wear your mask
★ Stay 6ft from others
★ Don’t shake hands
★ Cover your cough
★ Wash your hands afterwards
★ Minimize your time indoors
★ Vote
